On
Protection of Software
(12th - 13th November, 2011)

Organized By

*MICROSOFT CENTRE OF EXCELLENCE IN IP RESEARCH &
TECHNOLOGY POLICY
RAJIV GANDHI SCHOOL OF INTELLECTUAL PROPERTY LAW (RGSOIPL)
INDIAN INSTITUTE OF TECHNOLOGY KHARAGPUR*

at

IIT- Kharagpur Extension Centre, Salt Lake
HC Block, Sector - III, Salt Lake City, Kolkata - 700106

Overview :

The growing dependence of software globally, for virtually all aspects of transactions be it business, scientific, educational or entertainment has created a very competitive software industry, with software affecting almost every aspect of human life. To develop software, substantial investment of intellectual labor, time and money is required. In order to generate profit out of that investment, such software must be properly exploited and protected.

The course aims to track the recent changes in the protection of software at global levels along with an analysis of relevant judicial decisions. The course also attempts to deal with the issues relating to the internet space and the interface of intellectual property with Competition Law vis- a-vis the software industry. The course proposes a feasible mechanism for the protection of software under the ambit of Intellectual Property Law.

Objective :

- To understand the need for the protection of software
- To analyze the existing protection mechanism for software at the national and international levels
- To understand the emerging trend of software protection through an analysis of important judicial decisions
- To analyze the need of a separate law for protection of software.

Modules To be Covered :

- Module I: Introduction and Summary of the Course
- Module II: Copyright Protection of Software
- Module III: Patent Protection of Software
- Module IV: Trade Secret Protection of Software
- Module V: International Dimension
