Information

The Rekhi Centre of Excellence for the Science of Happiness has been set up to promote the science and practice of positivity for fostering meaningful life, happiness, wellbeing and holistic self-development.

It will attempt to understand and promote the science and practice of happiness for fostering human wellbeing through:

- fundamental and applied research
- technology development
- knowledge dissemination
- academic programs
- training and outreach activities

The centre workshop on 24th and 25th September will attempt to explore the various focus areas of the Centre with the help of thought leaders and practitioners in the field of Happiness

Centre Workshop

Indian Institute of Technology Kharagapur

**THE SCIENCE OF HAPPINESS:
RELEVANCE IN THE INDIAN CONTEXT**

24-25 September 2016

While it is undoubtedly true that the Science of Happiness has been a part of Indian wisdom for centuries, in a world of rapid modernization and change, it again needs to be rediscovered, re-explored and rearticulated with a distinctively scientific approach.

How to teach the science of happiness to our youth? How to address community well-being? Which areas of research to focus on? What scientific interfaces to develop? How to bring happiness to workplace? – in order to address these questions the Centre brings together eminent researchers and scholars on the Science of Happiness for a two-days brain storming session at IIT Kharagpur.

To be a part of this workshop, contact the Conveners (turn to the next page)
