TWO DAYS WORKSHOP ON C-4 MODEL FOR HIGH SCHOOL TEACHERS

DATE: 22ND AND 23RD APRIL, 2016

The Hypothesis

The hypothesis of the model states that in a high school, if trained and mentored properly, a student studying in grade or standard 'C' can successfully teach a class of students '4' years junior to him/her, i.e. standard 'C - 4' or 'C minus 4'.

For example, a student (C) of class VIII, if trained properly and mentored from time to time, can teach class IV students (C-4) successfully.

The Impacts of the 'C-4' Model:

<i>Social</i>	<i>Academic</i>	<i>Economical</i>
<ul style="list-style-type: none">✓ Develop Self confidence among 'C' students.✓ Improve communication skill✓ Get exposure and dream big✓ Take responsibility from early age	<ul style="list-style-type: none">✓ Enhance breadth & depth of knowledge; study additional materials✓ Developing new arts of teaching✓ 'C-4' students can feel more friendly with 'C' students	<ul style="list-style-type: none">✓ One teacher salary can support many 'C' students scholarship✓ Teacher's student ratio can be increased; more school can be opened✓ Less education cost for parents✓ Scholarship money can support BPL families
