**Introduction**

The responsibilities for land and environmental management for the projects are increasing daily. Management of land records and on ground verification, acquisition and safe keeping are both becoming contentious and difficult to manage- under tremendous public and political pressure. It is also important to have the knowledge of law, particularly the recent Land Acquisition, Rehabilitation and Resettlement (LARR, 2013) Act, and different state land conversion acts, etc. Alongside, during different stages of project construction engineering and management of environment clearance and records,, health and safety and disaster preparedness are also becoming more and stringent equiring specialized knowledge. The course will deal with all the above in great detail.

1. Recent and Amended Land Acquisition and Conversion Acts.
2. Public Hearing Needs and Strategies.
3. Basic Environmental Engineering of Soil, Air and Water.
4. Comprehensive Environmental Impact Assessment Criteria and Checklists
5. Workplace Health and Safety
6. Industrial and public disaster management.
7. Disaster planning and mitigation
8. Plant, mine, and site closure and rehabilitation.
9. Negotiation, 3rd party assessment and dispute resolution
10. Report preparation and writing.

**Round Table**

The course will have few round tables where the participants will be able to directly talk to the Officials, Regulators and Consultants to explain their problems and seek solutions.

**Course Material**

The course material will contain compilations of all the important rules, regulations and amendments required in the areas of land, environmental and safety clearances apart from the lecture materials.
